Mr. Joseph Legare Director, Project Management Division U.S. Department of Energy Rocky Flats Project Office 10808 Highway 93, Unit A Golden, Colorado 80403-8200

RE: Approval, Draft Data Summary Report for IHSS Group 500-1, IHSS 300-186, IHSS 500-117.1 and IHSS 500-197, dated September 2004

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) hereby grants approval for the subject report and, as a consequence, No Further Accelerated Action (NFAA) for IHSS Group 500-1. Comment resolution meetings, and subsequent revisions submitted electronically, were successful in resolving the Division's comments.

We specifically agree with the rationale, and necessity, of moving sample location BZ43-003 due to the occurrence of a thick valve vault concrete footer. The depth of the target interval, 12.5-14.5 feet, and the lack of erosion potential within the center of the Industrial Area, supports our determination.

Additionally, we agree that the rejected americium-241 data, associated with a statistical sample of the A interval at location CB44-013, was not significant and does not impact the NFAA decision. Adjacent plutonium and americium data do not indicate exceedances of the WRW ALs for either constituent near CB44-013.

We look forward to confirming that these and other minor changes are reflected in the final document. If you have any questions regarding this correspondence, please contact me at (303) 692-3367 or Harlen Ainscough at 303-692-3337.

Sincerely

Steven H. Gunderson RFCA Project Coordinator
